

Temsa will launch its electric bus in UITP Milan

TEMSA offers different type of models according to the various needs of the regional markets and of the particular usages: TOUR, TRIP and TOWN. TEMSA will add electric bus to its town range. This electric bus model was named MD9 ElectriCITY and will be launched in UITP in Milan which will be held between June 8th and 10th. Italy Temsa General Manager Dinçer Çelik announced that Electric bus work with fully electric energy and was designed to complete its route by making quick charge at the bus stop and final destination.

Temsa has been investing heavily in innovation and R&D at Adana manufacturing plant in last four years. Announcing in January 2015 press conference at Sabanc² Holding, TEMSA also plans to launch its first smart city bus, LF 12 IBUS after the launch of MD9 ElectriCITY. This new vehicle will be launched in Busworld 2015 is taking place in Kortrijk, Belgium between October 16th and 21st . Onboard technology on LF 12 IBUS contains the necessary telecommunications and information technology infrastructure to handle the smart city needs.
